

Samandar Tolibov

@samdevx

Samandar | Full-stack Web Developer • Ethical Pentester • AI Engineer • Bug Hunter • Automation Freak

Men kuchli backend tizimlar qurish, ularni tahdidlar nuqtai nazaridan sinovdan o'tkazish va sun'iy intellekt bilan integratsiyalash orqali texnologik loyihalarni yanada xavfsiz, aqlli va avtomatlashtirilgan holatga olib chiqishga ixtisoslashganman.

Mening ustunliklarim:

OWASP Top 10 zaifliklar tahlili, bug bounty tajribasi, etik hujumlar

AI bilan avtomatlashtirish: ChatGPT API, kod auditi, threat simulation

⚙️ Laravel + Livewire, Vue, Redis, Git, Linux CLI, Nginx

Tarmoq va xavfsizlik vositalari: Burp Suite, sqlmap, Hydra, nmap, Gobuster

Bug bounty mindset + secure-by-default kodlash falsafasi
"Build it. Break it. Secure it. Automate it. Repeat."
